geration (one per module)

Door control for
draught lobbies

Thermostat-
controlled heating

Colours include
green and white
(other options possible)

Integrates to
e-com platforms

REMOMEDI

THE PICKUP-PHARMACY MANAGEMENT TOOL

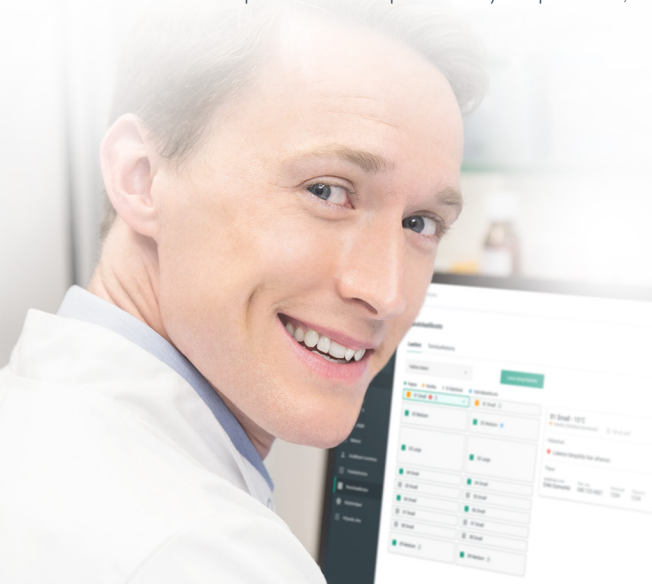

is an easy-to-use tool to create and manage customer deliveries.

You can create a customer delivery directly using the unit's display OR you can reserve a locker beforehand from any terminal in the pharmacy and bring the delivery to the reserved locker later.

The management tool enables you to

- reserve lockers for customer deliveries and monitor the reservation status of the unit
- track and manage delivery processes
- monitor the unit's temperature (*deviations are commented in the monitoring view*)

Delivery events, temperature history, and deviation records are saved in the service and can be later printed for a pharmacy inspection, for example.
